

WHAT IS CLAIMED IS:

1. A hollow golf club head comprising:
a front body including a face portion;
5 a back body; and
a middle body disposed between the front body and the back body and
extending from a toe side of a side portion to a heel side of the side portion
through a crown portion bending upwardly, wherein:

material of the middle member is lower in longitudinal elastic modulus
10 and specific gravity than material of the front body and material of the back
body.

2. The golf club head according to claim 1, wherein:
the material of the front body includes at least one of titanium and
15 titanium alloy;

the material of the back body includes at least one of titanium and
titanium alloy; and

the material of the middle member includes at least one of metal and
alloy, which have melt point equal to or lower than 700 °C.

20

3. The golf club head according to claim 1, wherein:

the material of the front body includes at least one of titanium and
titanium alloy;

the material of the back body includes at least one of titanium and
25 titanium alloy; and

the material of the middle body includes carbon fiber reinforced plastic.

4. A hollow golf club head including at least one of titanium and
titanium alloy, the golf club head comprising:

a front body including a face portion;
a back body; and
a middle body disposed between the front body and the back body and
extending from a toe side of a side portion to a heel side of the side portion
5 through a crown portion bending upwardly, wherein:
the middle body is thinner than the front body and the back body.

5. The golf club head according to claim 4, wherein:
the front body has thickness in a range of 0.8 mm to 1.2 mm;
10 the back body has thickness in a range of 0.8 mm to 1.2 mm; and
the middle body has thickness in a range of 0.6 mm to 1.2 mm.

6. The golf club head according to claim 1, wherein the middle
body includes at least part of the crown portion, at least part of a sole portion,
15 and at least part of the side portion.

7. The golf club head according to claim 1, wherein the middle
body includes at least part of the crown portion and at least part of the side
portion.

20 8. The golf club head according to claim 6, wherein a ratio of an
area of the middle body to an entire outer surface area of the golf club head is
in a range of 8 % to 35 %.

25 9. The golf club head according to claim 7, a ratio of an area of
the middle body to an entire outer surface area of the golf club head is in a
range of 5 % to 33 %.
